

SF 300

Flake ice machine

Model SF 300 A and SF 300 W

- Material: (housing) stainless steel, (container door) plastic
- Air cooling (A) or water cooling (W)
- Production capacity of flake ice in 24 hours: 320 kg
- Without collecting container, can be ordered as an option (463-1330) for approx. 141 - 181 kg of flake ice
- The Ice flake machine is placed and fixed on the container to save space, thus without feet
- Suitable for ambient temperatures from 10 °C to 40 °C, for water temperatures from 10 °C to 35 °C with a water pressure of 1 - 5 bar
- A water softener is recommended if the water hardness is greater than 7°
- Including hose for 3/4 inch fixed water connection and drain hose 0 20 mm
- Refrigerant: R452a (GWP 2141)
SF 300 A: 950 g; 2.034 t CO2 equivalent
SF 300 W: 650 g; 1.392 t CO2 equivalent

i A collecting container must be purchased for this model (463-1330) or a container must be placed underneath. (this only counts for the ice flake production without container)

Model	Order no.	GTIN	Price
SF 300 A	463-1300	4017337059201	8.616,00 €
SF 300 W	463-1305	4017337059218	8.479,00 €

SF 300 A: 230 V - 50 Hz - 1,2 kW	87 kg
SF 300 W: 230 V - 50 Hz - 0,950 kW	538 x 663 x 650 mm

D 205

Flake ice container

Model D 205

- Fits perfectly with the SF 300 A and SF 300 W ice flake machines
- Ice flakes container (3 cm insulation) with a capacity of 141-181 kg
- Material: (housing) stainless steel, (container door) plastic, (interior) high-density polyethylene
- Inner container hygienic, easy to clean, scratch-resistant
- Outer container made robust including door frame
- Door seals can be completely removed for easy cleaning
- Feet adjustable from 135 to 185 mm
- The water drain pipe of the container can be rotated 360 degrees for easy floor drain connection, including hose

Model	Order no.	GTIN	Price
D 205	463-1330	4017337059225	2.609,00 €

43/56 kg	768 x 848 x 1048 mm
